TECHNICAL SKILLS

Data Science

- Data analysis, preprocessing & visualization
- Supervised and unsupervised learning methods & tools
- Model evaluation and interpretation

Bioinformatics

- Biological data analysis
- Sequence data handling (e.g. FASTA files)
- Algorithms & workflows
- Image & signal analysis
- Biological data interpretation

PROFILE

Informatics graduate with a focus on Data Science and Bioinformatics. Experienced in data analysis, machine learning, software development, and UX testing through academic projects and practical experience. Before transitioning into tech, I worked as a confectioner and gained experience in gastronomy and agriculture. My background in different fields and 1.5 years of solo travel strengthened my adaptability, independence and problem-solving skills.

EDUCATION

Bachelor's degree - Informatics 09/2023 – 06/2026
IMC University of Applied Science Krems an der Donau, Austria

University Entrance Qualification (Berufsmatura) 09/2017 – 02/2021
Berufsbildungsinstitut (BFI) St. Pölten, Austria

Apprenticeship – Confectioner 09/2016 – 11/2018
Bakery Florian Hink, Wilhelmsburg, Austria

Technical School for Agriculture & Household Management 09/2013 – 07/2016
Fachschule Soos, Austria

UNIVERSITY PROJECTS

Gene Set Variation Analysis – Bioinformatics Project

- Analyzed gene expression data from tumor samples
- Applied clustering methods to identify patterns in biological data

ECG Arrhythmia Exploratory Data Analysis – Big Data Project

- Developed neural network classification models in Python
- Applied clustering methods (k-means) and evaluated model performance

Flood Information Platform – Scrum Project

- Developed a Django-based web application for flood information management
- Implemented real-time and historical flood information features

Train Ticket System – Database Project

- Designed and implemented database structures using SQL and Neo4j

Comparison of Manual and AI-Simulated Usability Testing - Bachelor Thesis

- Performed and investigated differences between traditional usability testing and AI-based simulated testing in a real-world scenario

Software Development

- Python, R, C, JavaScript
- Web development with HTML, CSS, Django, Flask, Node.js
- REST APIs, basic knowledge of gRPC and socket programming

Databases & Tools

- SQL, Neo4j
- Git, Docker, PostHog
- Scrum project experience

PROFESSIONAL SKILLS

- Problem-solving
- Communication
- Teamwork
- Adaptability
- Organization

LANGUAGES

- German (Native)
- English (C1)
- Spanish (Beginner)

WORK EXPERIENCE

Freelancer | [Upwork](#) (Remote)

10/2022 – Present

Occasional small projects in diverse fields, including:

- Search results correction
- Scripted speech & surveys

IT Intern | [StagePool Scandinavia](#) (Remote)

09/2025 – 02/2026

- UX testing
- Data analysis and competitor research
- Coordination between the content and development teams during testing

Publishing Assistant | [StagePool Scandinavia](#) (Remote)

03/2025 – 06/2025

Part-time job while studying

- Managed job postings and publishing workflows
- Assisted with content management and social media

Restaurant & Farm Assistant | [Grillenbergl](#) (Traisen, Austria)

09/2020 – 09/2023

- Production of home-grown juice, syrup, jam, liqueur, spirits,.. (seasonal)
- Food and beverages service

Farm Hand (Hegranes, Iceland)

11/2021 – 12/2021

- Animal care
- Basic household chores

Office Assistant | Chamber of Agriculture (Lilienfeld, Austria)

03/2021 – 05/2021

- Information desk support
- Assistance with funding applications
- Data digitization and record management

Confectioner | [Bakery Florian Hink](#) (Wilhelmsburg, Austria)

09/2016 – 09/2020

- Production of traditional Austrian pastries, cakes, and pralines
- Baking and decorating cakes for special occasions
- Seasonal work like Christmas cookies and ice cream production
